- RESTful API - KTOR, Retrofit
- DI - Koin, Dagger-Hilt
- Cloud Platforms - Firebase, Google Cloud Platform
- Maps - Google Maps SDK, Here Maps, Mapbox, TomTom API
- Database - Sqlite, SQLDelight(basic), Oracle DB, Room DB
-

Work History

ANDROID TECHLEAD, 05/2021 - Current

Ramson Softech Private Limited, Hyderabad, India

- Manage the development and deployment processes – make sure that the features are shipped optimally, and product stays healthy once they hit production.
- Provide mentorship and feedback to teammates to make your team the best version of itself. Motivate and encourage everyone to give their best work.
- Design, review, write and test code
- Flexible and adaptable, with a “can do” approach and solid problem-solving skill.

ANDROID DEVELOPER, 11/2017 – 05/2021

Ramson Softech Private Limited, Hyderabad, India

- Devised documentation for each app, detailing operation aspects, functions, capabilities and features.
- Designed user interfaces that engaged multiple senses and produced immersive experiences.
- Defined, created and maintained technical and user documentation, test cases and release notes.
- Employed third-party APIs to facilitate seamless access to external, in-app cloud data.
- Employed JUnit framework to perform unit tests.

Sri Krishnaveni Talent School - Vijayawada, India, March /2011

Projects

GPS Navigator - Traffic Weather - Spectra Apps

[GPS Navigator- Traffic Weather - Apps on Google Play](#)

- App which uses Google Maps API, TomTom Maps API and Open Weather API to Offer multiple GPS related features
- Followed Material Design Guidelines
- Simple UI with elegant colors for best User Experience
- Used Firebase Crashlytics and Analytics for bug tracing in production
- Implemented Remote Notifications using FCM
- RESTFul API - KTOR
- Completely written in Kotlin

Wall Space - HD Wallpapers - Spectra Apps

[Wall Space - HD Wallpapers - Apps on Google Play](#)

- An application with never ending images
- Using Pexels API for images
- Vibrant Space themed UI

Photo Editor & Image Filters - Ramsontech

[Photo Editor & Image Filters - Apps on Google Play](#)

- Application to edit Images
- Written in kotlin, also has a little Jetpack Compose
- Overlays and Filters - using PorterDuff
- Image Compression using Bitmap compression with support to multiple formats
- Collage maker - View based Collage maker

Christmas Photo Frames & Cards - Ramsontech

[Christmas Photo Frames & Cards - Apps on Google Play](#)

- Christmas Cards and photo frames app
- Basic UI for ease of access

My Music Player - MP3 Player - Raamo Apps

[My Music Player - MP3 Player - Apps on Google Play](#)

- A simple music player app written in Kotlin with a hint of Jetpack Compose
- Developed in collaboration with design team
- Used Room DB to store data for some features

- MediaStore API and SAF to access local files
- Exoplayer as Music player with full-fledged Media Notification Support

My Name Ringtone Maker - Raamo Apps

[My Name Ringtone Maker - Apps on Google Play](#)

- An application which uses TTS engine to generate Audio files and MP3 Cutter
- Basic Design to support variety of target audience
- Audio Cutter feature using MP
- Exoplayer as Media player for better control

All Village Maps - Shamitech Apps

[All Village Maps - App on Google Play](#)

- App which displays Indian Villages in an order
- JSON - Using JSON files displayed data of all villages
- Used Geocoder to get coordinates of any place searched
- Also has other features like Area Codes & STD Codes

GPS Navigation, Map Directions - Shamitech Apps

[GPS Navigation, Map Directions - App on Google Play](#)

- Application which offers Location based features
- HERE Maps SDK as backend
- Geocoder for Geocoding and Reverse Geocoding
- Open Weather SDK for weather updates
- Used Device Magnetometer and gyroscope for compass

Additional Information

Projects under Development

Professional:

- Family Tracker - An App to know location of your buddies and connections
- Money Manager - Expense Tracker
- Sticker Maker - Using Google Selfie Segmentation extract Subject from an image and save it to new file

Personal:

- Notification Sorter - Sort your notification by app or category and keep a track of them by backing them up to cloud
- Priv-Chat - A chat box app to chat with my friends using mongo DB as backend

Currently Learning:

- Jetpack Compose - Competent
- Swift language - Beginner
- Swift UI - Beginner
- Kotlin MultiPlatform - Novice
- Compose MultiPlatform - Intermediate
